Worsened	Hadiyan Nurdyana	-346 mnt
Worsened	Taufik Dika Permana	-171 mnt
Worsened	Heri Hermawan	-79 mnt

Risk Interpretation

- Primary monitoring priority is placed on employees appearing simultaneously in low scores and high lateness duration/frequency.
- Taufik Dika Permana and A. Gymnastiar recorded scores of 16.25 and 26 with significant lateness requiring targeted intervention.

Management Insight

- Aggregate attendance discipline improved: total late minutes down 788 (17,5%) and late days down 36 (18,5%).
- A total of 8 out of 28 employees fall into the <60 score band; 9 achieved >=90 score.
- Concentrated risk identified for Taufik Dika Permana, A. Gymnastiar, Ade Suharmin, Ramdani Pratama Saepudin, Nizar Muharam based on the combination of low score and high late metrics.
- Ikbal Dwipayana Romli demonstrated the largest minute improvement (+541), followed by Nizar Muharam (+465).
- Recorded absences: permit 1, sick 3, sick without note 2, unexcused 0, leave 0, WFH 0.

Recommended Management Actions

- Institute monthly monitoring for employees with score <60 and review outcomes in the subsequent cycle.
- Conduct coaching or causal clarification for employees experiencing notable deterioration in lateness minutes or days.
- Differentiate management approaches between lateness duration issues and lateness frequency issues.
- Monitor sustainability of gains among high-improving employees to ensure positive momentum is sustained.
- Reconcile employee count discrepancy (33, 33, and 28) before utilizing data for formal policy decisions.

EXECUTIVE CONCLUSION

Juni 2026 indicates an overall improvement in attendance discipline with lateness reduction.

Decision priorities: monitor high-risk personnel, investigate root causes of delays, and evaluate corrective actions next period.

Prior to formal actions, employee coverage basis should be reconciled to align executive decision-making.
